

# *China to Build Agra Business in North Dakota*

**By Dr. R. Pletsch**

The lack of safety becomes more and more evident for those who watch the news carefully. It has been reported in American papers that the Chinese are proceeding with a 370 acre plot of land north of Grand Forks, North Dakota. It is near a US military base with sensitive drones, satellite and surveillance technology.

The process seems to be highly legal, as the Grand Forks City Council annexed the land and changed zoning to allow for the use of the land. Fufeng Group has said that they have done all the local laws called for. This is all the land they asked for.

Local politicians in North Dakota state that every company allowed to work outside of China has "strong ties with the Chinese Community Party" (CCP). These local politicians claim they need the jobs and the tax money for the land. Senator Marco Rubio of Florida, Senator Arcine of North Dakota, and Senator Arns of North Dakota have filed with CFIUS which has been set up to promote American rights vs. foreign powers.

When you combine this with threats against South Korea, Japan, Australia and other countries the United States considers allies, who do not trust our leadership in Washington, that shows no desire to stand up to the threats. You don't read it in our history books that much, but the Chicoms sent a million men over the border of North Korea to attack United Nations troops without any warning. Hopefully, this will never occur, but you should be prepared, especially if they already have a base in North Dakota.
