

Pre-Zoom Workshop Requirements for Sponsors

1. To ensure a quality Zoom Casting Workshop experience, ASOP is requesting that all sponsors participate in a pre-workshop online Zoom “test” session. This will be conducted at an agreed upon time at least one week prior to the workshop session. It is important that this test be conducted from the same area that the sponsoring facility will be using for the workshop. We want to ensure that there is appropriate lighting within your casting area so our online instructor(s) can view the student participants. Lastly, please test your WIFI system and audio capabilities.
2. All workshop students are required to be ASOP members at least ten days in advance of the scheduled workshop.
3. Before the online session, Zoom workshop students will be required to review: (1) all ASOP Casting Videos and (2) the Orthopedic Study Guide. Additional assignments may be required according to the content of the zoom workshop.
4. Required casting supplies for a zoom workshop will be on an individual workshop basis. Such supplies are based on how many students are in attendance and which casts will be practiced during the zoom workshop. A list of required supplies will be provided at least 20 days in advance of the workshop.
