

Support EFF

EFF is a 501(c)(3) organization that strives to expand its programs and offerings to the endocrine fellow community. With the assistance of educational focused individuals, we are able to continue to educate fellows and we invite you to donate now.

Alumni of the Month

Emory Hsu, MD
Published Project:
Advances in treatment of glucocorticoid-induced osteoporosis

Emory attended ASBMR's Annual Meeting this past September. He recently published a review on glucocorticoid induced osteoporosis. Click [here](#) to read his review.

Congratulations Emory!

Send us your accomplishments! We want to hear from any fellow whom has attended an EFF program or received an EFF grant.

Have you been published? Received and honor or award? [Let us know!](#)

Presidents Letter

As 2018 begins, many of you are contemplating career choices for your life after fellowship. Opportunities in endocrinology, while much more available than in years past often are limited by fewer funded positions in academics or are geographically limited for private practice opportunities. There are two attractive career options that most fellows are not familiar with. Because of the firewalls between pharma and academic programs, exposure to career opportunities in industry are limited, and a career in pharma can offer the opportunity to pursue basic science at the highest level or advance clinical care when heading up or working with a disease state team. Career/life balance is also more available in this career path. That said, the career path in industry has two cautions. One, it is more difficult to return to or establish a clinical practice once away for a period of time. Two, your career inevitably tied to a product cycle or success and unexpected problems in drug development can lead to an abrupt unplanned job change.

The second career path which has been most common here at Northwestern and one that I've been able to enjoy academically and clinically for 3 decades is the Internist/Endocrinologist. While pure endocrine opportunities may not be available in your desired area, few are better suited to handle general medicine than the endocrinologist. Many if not most of your diabetic and thyroid patients are often looking to consolidate their care with a single provider and this hybrid career affords that opportunity. Ironically in an era where lab reimbursement is vanishing, compensation is often higher on the internist side than the endocrine side and practice building is significantly easier. Whatever your career path, know that you are a part of the most stimulating integrative specialty in all of medicine and your years ahead will be personally well rewarded.

Have a happy, successful New Year,

Dr. Mark Stolar

2017 Diabetes Mellitus Preceptorship Summary

The 2017 Diabetes Mellitus Preceptorship was a success. Fellows were impressed with the program and noted that it was an excellent educational experience. View more testimonials from fellows below:

"The diabetes preceptorship was an incredible experience! The teaching faculty were excellent and we learned much about both clinical medicine and the latest research techniques/strategies. Participating in this preceptorial has undoubtedly made me a better clinician-investigator."

"This has been truly a great experience. The knowledge I acquired during the week has been phenomenal. I strongly recommend this continues in the years to come!"

"The educational content of the preceptorship was phenomenal. All the presentations were very clinical relevant and up to date. The lecturers are one of the best I have encountered. Very engaging and absolutely outstanding in their fields."

EFF's Board of Directors

Mark Stolar, MD

EFF President

Associate Professor, Clinical Medicine-General Internal Medicine and Geriatrics

Northwestern Memorial Hospital

Northwestern University Feinberg School of Medicine

Chicago, IL

John P. Bilezikian, MD

EFF Chair

Professor of Medicine and Pharmacology

Columbia University Medical Center

New York, NY

Derek LeRoith, MD, PhD

EFF Treasurer

Professor of Medicine and Chief, Endocrinology, Diabetes and Bone Disease

Director, Metabolism Institute

Director, Metabolic Mechanisms of Diabetes and Cancer Laboratory

Icahn School of Medicine at Mount Sinai

New York, NY

Annaswamy Raji, MD, MMSc, FACE

EFF Board of Director

Principal Scientist/Medical Director

Merck Research Labs

Rahway, NJ

Endocrinologist

VA Health Systems

Lyons, NJ

Emeritus Board Members

Sherman Holvey, MD

Clinical Professor of Medicine, Emeritus

University of California School of Medicine

Los Angeles, CA

Ramachandiran Cooppan, MD

Assistant Clinical Professor of Medicine

Harvard Medical School

Consultant

The Joslin Diabetes Center

Boston, MA
