- Paints and urethanes by Haley Paint

Metal & Trim by

$\frac{7}{16}$ smartside with
silverttech backing
(on painted & ure-
thane buildings)

Item # 250842

Delivered Fully Built!

Delivery Process

All pricing with the exception of metal and vinyl garages (built on site) are priced to be delivered fully constructed. We ask that the customer checks the path leading to desired location of the shed site to ensure of **at least 16" greater width than the shed**. The driver will then offload in the driveway or street and carry the shed in with the mule. If conditions are too tight we offer a build on site service.

The Mule

The customer is to provide 2" and 4" thick solid concrete patio blocks for the driver to level the building. We encourage a level gravel base for buildings larger than 12'x24'. We discourage any leveling with patio blocks if the shed site is off level more than 20" end to end or side to side. **A charge of \$9.00 per inch will be assessed anything exceeding 20" off level.**

Skid Layouts

Standard Metal Buildings

8' wide comes with a 5' rollup or double doors.
10' through 14' wide come with 6' rollup or double doors.
