

# revive life academy – music lessons

## AN INSTRUCTOR FOR EVERY KIND OF PIANO

There are a wealth of styles of piano that people are interested in, and our instructors can provide skilled guidance in all of them. If you want to learn it, we will teach you how to play it:

### **Classical– Pop– Modern– Jazz– And More!**

There's no need to suffer through learning music that you aren't really interested in like you might at a group class. Instead, our instructors speak to you about your passions and interests and customize a lesson plan to help you become the best musician you can be while also having plenty of fun.

If you want to learn to play but aren't sure what genre you're interested in, that's no problem. Our instructors will help you learn the basics so that you can start playing simple songs, and then you can discover what really sparks your passion. Not everyone knows what they want to play at first, and that's okay!

## OUR PIANO TEACHERS

Because we have the interests of all our students at heart, our professional team of piano teachers are not only passionate about their line of work but also have a wealth of experience as instructors. Many of them are recording and performing professionals who've toured the country and different parts of the world extensively. On top of that, they have varied and adaptable approaches to offering piano lessons for beginners and advanced learners of all ages.

## BEGINNERS AND ADVANCED STUDENTS WELCOME

Our students range from those who have never touched a piano in their lives to those who are already performing. Beginners start with the basics, including chords, scales, note reading, and simple songs. This builds a foundation so that as you advance, you have the necessary skills to play harder and harder pieces.

More advanced students learn tips and tricks for improving their performance. We move on to harder songs and help you polish your performance. Whether you are a beginner or an advanced student, we tailor our lessons to your interests. Even simple songs can come from a variety of genres, and we want to teach you the ones that interest you the most! Interested, passionate students learn better and enjoy themselves more, which are both things we believe are very important here

## HOW TO IMPROVE YOUR PIANO SKILLS: PRACTICE

The best instructors in the world cannot make you the best player you can be if you don't practice. Practice is where you put the skills that you have learned in lessons into use. Muscle memory begins to get built, so that your hands know where to go without you having to pause and think about it. Note reading skills improve the more you sit down and figure it out. Your timing will improve. Every part of playing benefits from practice!

Plus, when you practice, you can take note of any questions you might want to ask your instructors. You can also think about specific things that you are interested in learning more about, and things that you are struggling with. The more you know about what you want to learn and enjoy doing, the better we can customize our lessons to help you!
