

HOW to MEASURE

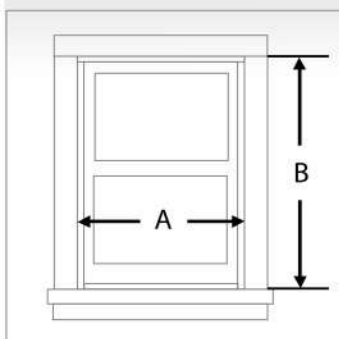

All measurements are taken from the outside and should be the door frame opening.

1. Take three measurements on width (A): top, center, and bottom. Use smallest figure.
2. Measure height (B) from top of opening to sill. Measure both sides and use smallest figure.

When ordering pre-hung doors, face the door from the outside and specify whether hinges are left-hand or right-hand.

Note: Windows should be ordered by frame opening size. Do not make allowances. We will make allowances.

1. Measure opening width (A) at top, center, and bottom of window to be sure opening width is constant. If dimensions are not equal, select either the maximum or a compromise, as part of the storm window fin can be trimmed for a snug fit.
2. Measure opening height (B).

2. Measure opening height (B).

Door Tech Products

Pet Doors

We can install your pet door into any
self-storing storm or screen door faster
than you can say, "woof!"

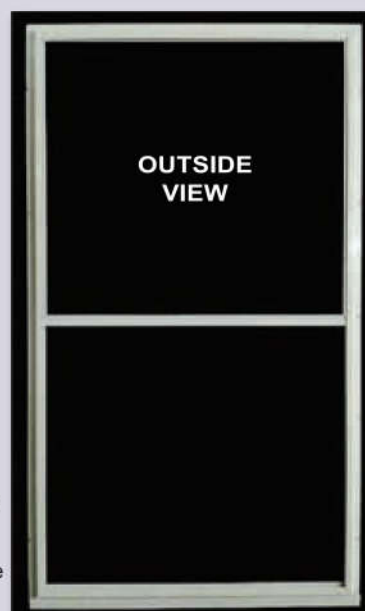

Your finished product comes with:

- ✦ Plastic slide in locking panel that allows you the freedom to manage your pets comings and goings
- ✦ Flexible flap containing a magnetic strip along the base to help keep your home safe from outdoor conditions, while allowing your pet easy access to the home
- ✦ Aluminum Frame comprised of heavy duty material that can handle lively households

Storm Windows

- Maintenance-free extruded aluminum
- Available in:
 - Mill Finish
 - White Finish
 - Bronze Finish
 - Beige Finish
- Triple track self-storing glass & screen inserts
- Drop-in vinyl glazing
- Wool pile weather-stripping
- High quality die-cast hardware
- Adjustable sill expander for perfect fit
- Removable inserts for ease of cleaning
- Wedge locks to minimize rattle
- Freedom from noise, drafts, insects
- Insulation for both heating and air conditioning
- Greatly reduced maintenance of prime windows
- Ease of changeover from insulation to ventilation
- Ease of installation; simple for "do-it-yourselfers"
- Increased protection
- Available in picture windows, flat panels and sidelights

WINDOW LATCHES

Aluminum Access Doors

The access door is manufactured with aluminum kick plate material and primarily used as a foundation crawl space door. This unique design may be adapted in a variety of situations and manufactured to most custom size requirements.

Access Door Features:

- ✦ Double Insulated Kickplate
- ✦ Keyed Lock Available
- ✦ 1" or 1 1/4" frame options
- ✦ Available in 3 or 4 sided construction

Why Door Tech's Access Door?

- ✦ **REINFORCED CORNER GUSSETS** - for a long-lasting smooth operation and prevents door sag.
- ✦ **HARDWARE INCLUDED** - Like all our doors, hardware comes included at no additional cost!
- ✦ **NO TWISTING OR SPLINTERING** - Made of heavy-duty aluminum for unmatched strength.
- ✦ **POWDER COATED** - for a durable long lasting finish

Additional Door Options

Custom Sized Doors

- ✦ We can customize all of our doors to fit any opening you have up to 60" wide and 120" tall.

French Doors

- ✦ All we need is your opening size/operable door and we will have your new set of French Doors to you in no time!

Inswing Door Options

- ✦ Perfect for screened in porches or anywhere an outswing door just won't do!

Universal Door Options

- ✦ Allows you the flexibility to decide the hinge side at the job site.

Powder Coated Custom Colors

- ✦ All of our custom colors are powder coated for a finish that is as attractive as it's durable!
