Wholesale prices for Trade customers only

JUNE 4, 2021

TERMS AND CONDITIONS OF SALE FOR FEB. 1, 2021

**ATTENTION: ALL PRICES ARE SUBJECT TO CHANGE
WITHOUT NOTICE. PLEASE CALL TO CONFIRM PRICES**

ALL PRICING IN THIS CATALOG IS FOR TRADE CUSTOMERS ONLY

IF YOU DO NOT FIND AN ITEM YOU NEED, CALL US. WE CAN OFTEN LOCATE THE ITEM OR DIRECT YOU TO WHERE IT MAY BE FOUND.

BUSINESS HOURS:

Office, sales counter, and warehouse hours MONDAY through FRIDAY are 7:30 AM to 4:00 PM. **MARCH-JUNE and SEPTEMBER-OCTOBER, open MONDAY through FRIDAY are 7:00 AM to 4:00 PM, Saturdays 8:00 AM - Noon.** In the event of a winter storm, please check the phone message for hours.

TERMS:

Net 30 days from date of invoice to approved credit accounts. All other shipments are C.O.D. until credit is established. A finance charge of 1.5% per month (18% per annum) will be added to all overdue accounts. We reserve the right to cancel credit at any time. C.O.D. shipments will be made to all accounts with a balance over 60 days. Payments will be applied to the oldest invoice. Orders will not be processed to any account that is unpaid 90 days from invoice date. Checks are accepted with proper business identification. We accept VISA, MASTER CARD, and DISCOVER and DEBIT CARDS for your convenience. Customers without accounts must pay by CASH or CREDIT CARD. **Credit cards are for payment at time of sale!(For customers with terms, you can pay with a credit card within 5 days of invoice date. After 5 days a 2% convenience fee will be charged)**

PICK-UP:

We maintain an efficient pick-up department, enabling our customers to satisfy their needs quickly.

SHIPPING:

We operate a delivery service to our **local** customers. RATES: \$ 3000 or greater than = no delivery charge.
\$ 1000 = \$ 15 delivery charge. \$ 500.00 - \$ 999.00 = \$ 35.00
Any order in New York City = \$ 165.00.

(Exceptions are Lime, Mulch, Turface, and Ice Melter: delivery price determined by distance & dollar value)

U. P. S. will be used when possible.

A parcel delivery service will be used for smaller orders within and outside of our normal delivery area. No deliveries to P.O. Boxes. Residential address deliveries have an additional \$1.50 charge added to the rate. A handling charge of \$ 2.50 will be added to all U. P. S. or Fed Ex shipments. U. P. S. or Fed Ex will accept C.O.D. deliveries at an additional charge. This charge will be added to your invoice.

A Moffit is available for product offloading for sites without a forklift. Use of moffet will incur a charge of \$75.00 in addition to any freight charges

RETURNED CHECKS:

There will be a \$ 40 charge on all checks that are returned. After the first returned check, credit cards only.

CLAIMS:

Please inspect your order immediately for damage in transit. Any concealed damage or shortages must be called by the third business day after receipt of goods. Claims for shortages, or damage must be filed with the driver. All claims for errors or unsatisfactory stock must be reported upon receipt and confirmed in writing within 30 days or all consideration will be waived.

RETURNS:

Merchandise must be returned within 2 weeks of purchase. No merchandise may be returned without prior authorization from our office, or it will be refused. A restocking fee of 15% will be charged on all returns, unless the merchandise is defective. Items that are special order, made to customer specifications, or non-inventory, non-stocked items, may not be returned for credit.

SALE OF RESTRICTED USE PESTICIDES:

To purchase restricted use pesticides, we are required by law to maintain a signed copy of your current pesticide applicator's permit on file.

IMPORTANT NOTICE TO PURCHASERS

THE FOLLOWING IS MADE IN LIEU OF ALL WARRANTIES EXPRESSED OR IMPLIED:

The seller is not liable for any injury, loss or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, user shall determine the suitability of the product for his intended use, and the user assumes all risks and liability whatsoever in connection therewith.

Any claims for loss or damage in the use of the product must be submitted to the manufacturer.

The seller makes no recommendations, expressed or implied, on any of the products sold. The seller does not package, repackage, alter, formulate or manufacture the product except for grass seed; therefore the seller assumes no responsibility or liability whatsoever in the use of the product. The forgoing may not be changed in any way whatsoever.

PRODUCT AVAILABILITY

We are pleased to present you with the 2018 Edition of ***Levitt's Landscape Supply Catalog***. In it, you will find quality products that are being used by successful landscapers today. Some of them are the familiar "industry standards", while others are new, innovative products, which show promise of being the "industry standards" of tomorrow. Quantity discounts are shown in the pricing alongside the product description.

COOL SEASON TURF GRASS

Turf Type Tall Fescue

Turf Type Tall Fescues provide a beautiful lawn with low maintenance; a dense root system makes this a drought tolerant grass. Tall Fescues are used in shade or sun mixes. Tall Fescues can endure heavy foot traffic. Improved varieties have higher disease and insect resistance.

Turf Type Perennial Ryegrass

The varieties we suggest have excellent density, color, texture and disease resistance. Turf - types can be used for lawns, athletic fields, parks and golf courses.

Kentucky Bluegrass

Kentucky Bluegrass became the standard by which all other cool season grasses are measured as to quality, texture, color and longevity. Research has produced many new varieties that have better color, are higher in disease resistance and can be mown lower.

Fine Fescue

A general grouping of grasses that survive cold and combine well with other cool-season grasses. None of the fine fescues tolerate traffic well. They do, however, grow very well under shady conditions.

Creeping Red

- Great in shady or low maintenance areas - High Shade Tolerance
- Used in "no mow" mixes
- Great for slopes, roadsides, and links effect golf rough

Chewings

Hard

- Strong bunch - type growth habit
- Will persist in difficult sites that are unusually cold, windy and dry
- Used in "no mow" mixes reclamation and wildflower mixes

Sheep

A drought-resistant bunchgrass, somewhat harder than any of the other fescues. Provides excellent ground cover.

SPECIALTY SEED

GCV01 CROWN VETCH 1 LB \$ 35.50
1 LB COVERS APPROXIMATELY 2,000 SQ. FT.

GCV05 CROWN VETCH 5 LB \$ 167.00

SEED STARTING FERTILIZER

18-22-10 with 10%Organic +1%Iron

A control-release Starter/Winter fertilizer plus iron provides available and slow-release nitrogen and high-level phosphorous for seeding, root growth on sod. Covers up to 12,500 sq. ft. pallet/45

LA18 50LB \$ 23.25 45+ \$ 22.09 135+ \$ 21.16

10-12-5 with TKCAL+

10-12-5 starter fertilizer with 17% available calcium. An application of TK CAL+ at seeding will increase the vigor and density of the grass. Covers up to 10,000 sq. ft. pallet/45

LA10125 50LB \$ 19.00 45+ \$ 18.05 135+ \$ 17.29

HAY / STRAW

HEAT TREATED HAY

Premium Ground Cover is an important addition to new seeding, it not only conserves moisture, but helps prevent weeds from growing. When seeding, save time, as it doesn't need to be raked it off. One bag will cover up to 500 sq ft at 1/4" of an inch thick. 50/pallet.

LSSB \$ 13.65 50+ \$ 12.97 150+ \$ 12.29

SEED COVER

PENNMULCH

PennMulch pellets are made of recycled paper that breaks down naturally. Each pellet contains super-absorbent copolymers and tackifier. Each pellet absorbs up to 400 times its weight in water, which will release as needed to the surrounding soil. Contains a 1-3-1 charge of fertilizer. Speeds up germination, saves time, easy to apply. 40lb bag covers 800 SF at 1 LB of Phosphorous / 1,000 SF. 50/pallet.

EHP 40 LB \$ 18.10 50+ \$ 17.20 150+ \$ 16.47

LC50 50LB \$ 9.35 50+ \$ 8.88 150+ \$ 8.51

LIME & SOIL CONDITIONERS

TK CAL+ will raise soil pH in as little as eight weeks, unlike pelletized lime which can take up to eighteen months. 75% less labor, transport cost, and storage space. Pure, ultra-fine ground pelletized calcium carbonate (38% Ca) is impregnated with 2% PHCA, our proprietary organic acid. When applied, PHCA reacts with the insoluble calcium, both in the soil and on the particle, and converts it into TK CAL+, making the calcium immediately available for plant uptake and pH adjustment. An application of TK CAL+ at seeding will increase the vigor and density of the grass. TK CAL+ is available as a starter fertilizer: 10-12-5 with 17% available calcium. 45/pallet

CARBON-X XPRO features a patent pending **CARBON RELEASE ROOT PROMOTING (CRRP)** technology capitalizing on the uniquely porous structure of biochar infused with **ROOT HAIR PROMOTING PEPTIDES**. Our proprietary production (composting) process charges the biochar with an ability to store, retain, and ultimately release supplied ions (synthetic nutrients). Studies show a 139% plant mass increase when compared to synthetic controls and pure biochar+synthetic supplements. Combined with nitrogen stabilizers, **CARBON-X XPRO** delivers up to 10 weeks of nutrient delivery.

The results speak for themselves. Carbon-X delivers.

CRABGRASS PREVENTER+FERTILIZER

18-0-4 with .13% Dithiopyr (dimension):

A fertilizer with .13% Dithiopyr(DIMENSION) for the pre- and post-emergent control of crabgrass, goosegrass, and other annual weeds. 20% XCU nitrogen source for quick green-up without excessive growth. Covers ~11,000 SF. 45 bags per pallet. Use as split application 5-10 weeks apart. Reseed in 10 weeks. Controls over 20+ additional weeds. Use in Fall for Poa control.

LE18D 50LB \$ 22.50 45+ \$ 21.38 135+ \$ 20.48

19-0-0 with .172% DITHIOPYR:

Similar to LE18D, but with a larger percentage of **Dithiopyr** and a 30% XCU nitrogen source. Covers 12,500 - 16,000 SF. 45 bags per pallet. 45 bags per pallet. Controls over 30+ additional weeds.

LE19DX 50LB \$ 24.00 45+ \$ 22.80 135+ \$ 21.84

12-0-0 20% XCU with .172% DITHIOPYR: Covers 12,500 - 16,000 SF. 45 bags per pallet.

LE12DX 50LB \$ 21.25 45+ \$ 20.19 135+ \$ 19.34

17-0-0 25% SCU .15% Dimension

Lebanon manufactured product using the Corteva brand Dimension. Fertilizer plus pre-emergent weed control. Pre and post emergent control of crabgrass. This product will also control many annual grassy weeds and some summer annual broadleaf weeds such as Oxalis, Spurge and Purslane.

LE17D 40LB \$ 23.25 45+ \$ 22.09 135+ \$ 21.16

18-0-3 with .42% PRODIAMINE(Barricade):

25%XCU provides a slow release nitrogen for early green-up without excess growth, with Barricade providing long term pre-emergence control of Crabgrass and over 30 other weeds. Reseed in 16 weeks. Covers 11,000 – 16,600 SF. 40 bags per pallet.

LE18BX 50LB \$ 20.00 40+ \$ 19.00 120+ \$ 18.20

21-22-4 with .08 MESOTRIONE (Tenacity):

Starter fertilizer with 0.08 percent Mesotrione herbicide. Unlike most herbicides, this product is ideal for use during turf establishment, renovation or overseeding. Can be used to control of 33 listed broadleaf and grassy weeds. Covers 9,000 SF. 45 bags per pallet.

LE21M 50LB \$ 60.00 50+ \$ 57.00

9-0-0 CORN GLUTEN: organic control

CGM is an excellent source of Nitrogen and controls broadleaf, grassy weeds, and Crabgrass. CGM allows seedling shoot to emerge, but inhibits root development. After a period of water stress, the seedlings wilt & die because they do not have an adequate root system.

Do Not Apply to Newly Seeded Areas. 50 LB treats 4,000 SF. Apply spring & fall. 50 bags per pallet

RANGER PRO GLYPHOSATE GENERIC ROUND UP

An economical alternative to **Roundup®**

41% **Glyphosate (Roundup)** plus surfactant. It trans-locates throughout the treated plant into stems and roots, preventing re-growth from underground reproductive parts. No residual activity in the soil and will not harm roots of plant material that grow into treated area. 2/3 to 2-2/3 oz mixture per gallon per 1,000 SF. See label for additional rates. Tank mix with pre-emergents like **Surflan**, **Pennant**, **Weed Impede**, and **Pendulum** for season-long control.

(SCYTHER)

Visible effects within hours! **Scythe Herbicide** is a non-selective, post-emergence weed control for grasses and broadleaf weeds. It is formulated to deliver maximum performance and provides fast acting results on a long list of weeds and grasses, as well as most mosses and lichens. Made of natural fatty acids, **Scythe Herbicide** works by removing or "burning" the waxy cuticle of green vegetation. Will not move through soil to injure nearby plants. Very concentrated - 2.5 gallon concentrate covers up to 1 acre. Repeat applications may be required on larger weeds

CSCY2.5 2.5 Gallon
\$ 183.00 2+ \$ 173.85

PHYDURA ALL NATURAL WEED KILLER

Phydura is an all natural, non-selective herbicide made from clove and soybean oils. When you spray **Phydura** on weeds and grass, it works fast (within 24 hours) to destroy the foliage through a burn down process. Use for weed control on driveways, patios, sidewalks and along fence rows. **Phydura** is 100% biodegradable and safe for the environment. **Approved for school use.** Mix 3 parts water with one part **Phydura** (one qt. makes one gal. of spray.)

CPHYDQ Quart \$ 17.00
CPHYD 2.5 Gallon \$ 115.00
2+ \$ 109.25

X-OUT

Non-selective post emergent herbicide

X-Out is a post emergent, non-selective, herbicide, **X-Out** is a foliar-active material with little or no soil-residual activity. Visual results showing necrosis of leaves and young shoots occur within 2 to 4 days after application under good growing conditions. Excellent tank mix partner with pre-emergent herbicides such as proflam, oryzalin and oxadiazon. Reduced translocation enables ability to create and maintain clear boundaries around golf turf, sand traps, and athletic fields and accurate application areas around existing ornamentals in landscape beds

TOTAL KILL

PRAMITOL 25E

Used to kill vegetation and prevent regrowth. **Pramitol** is a long-lasting soil sterilant, excellent for sidewalks, patios, fence lines along driveways and under stone or asphalt. Much of its activity is through roots; therefore, its effectiveness is dependent on rainfall to move it into the root zone. Very dry soil conditions and lack of sufficient rainfall may result in poor weed control. **Pramitol** can easily leach downwards towards desirable plants or water sources. Rate: 8 - 14 oz in 1 gallon of water per 500 SF.

CPRM2.5 2.5 Gallon

\$ 107.00 2+ \$ 109.00 2+ \$ 103.55

AQUATIC

Roundup® Custom Aquatic (REPLACES RODEO)

Roundup Custom is a non-selective aquatic herbicide and is highly effective on more than 190 species of emerged weeds, including a wide range of annual and perennial grasses, broadleaf weeds and sedges. It works in most aquatic settings better than other weed control options, because it offers application flexibility. Glyphosate, the active ingredient in Roundup Custom herbicide, has favorable environmental characteristics, such as degradation over time in soil, sediment, and natural waters.

This easy-to-use solution promotes better establishment of transplants. It includes 11 strains of endo- and ecto-mycorrhizal fungi, which improve a plant's nutrient uptake. Total-Pak also includes biologically active soil conditioners, a natural wetting agent, humic acid, kelp extracts, and seven micronutrients

1284630281 8oz Packet \$ 15.00

1284630285 20lb Pail \$ 425.00

What is Mycorrhizae

"Mycor"-rhiza" literally means "fungus"-root" which defines the mutually beneficial relationship between the plant and the root fungus. These specialized fungi colonize plant roots and extend far into the soil. Mycorrhizal fungi increase the surface absorbing area of the roots 100 to a 1000 times, thereby greatly improving the ability of the plant to access soil resources, namely water and nutrients. Azaleas and Rhododendron do not respond to mycorrhizal fungi.

Soil Moist
Water Retaining Hydrogel

When mixed in the soil, **Soil Moist** crystals will soften and swell as water is added and absorbed. When the soil dries, the polymer will release its water to the plant. **Soil Moist** acts as a water reservoir—even during periods of drought, the stored water is released to the plant. The expansion and retraction of the polymer during the watering cycle helps soil aeration, which is important to all plants. Useful life is approximately 5 years. Each particle holds 200X its weight in water. 1 LB of **Soil Moist** = 20+Gallons of water.

- Reduces plant waterings • Reduces evaporation of moisture from the soil • Time releases fertilizer and water • Encourages deep root penetration •
- Reduces soil compaction • Minimizes transplant shock • Lasts several seasons • Cost-effective • Environmentally friendly •

SOILMOIST SEED COAT

Soil Moist Seed Coat is a crosslinked polyacrylate and graphite compound. It is designed to increase the germination of grass and other types of seeds. The polymer compound retains excess moisture from water and humid air. The moisture on the seed softens its tissue to promote faster germination. The graphite compound retains heat on the surface of the seed to promote germination. The graphite helps lubricate the seed and equipment to help spread the seed. Eight ounce of Seed Coat material will treat 50 lbs of grass seed.

EROSION CONTROL

CURLEX (EXCELSIOR I)

Single net, 100% excelsior wood fiber to control heavy run-off. CURLEX is a wood fiber mesh with a poly netting. With 80% of the fibers 6 inches or greater in length with consistent thickness of fibers evenly distributed throughout the entire area of the blanket. The top of each blanket is covered with photo degradable or biodegradable netting. Material does not contain any weed seed or chemical additives. For slopes 2:1 to 1:1, and swales.

ATHLETIC FIELD SUPPLIES

Surface MVP

Ideal for mixing in native soil to prevent compaction and amend poor soils during construction or renovation. It holds moisture and nutrients in your turf and increases drainage as a result of balanced air and water pore space. MVP can also be used as a topdressing prior to events when rain is forecast to absorb initial rainfall, add traction for athletes and prevent turf damage. Pouring MVP directly on muddy areas will instantly absorb the excess water and turn it into a dry surface. 40/pallet.

LTMV 50LB \$ 13.00 40+ \$ 12.35 120+ \$ 11.96

There's no substitute for conditioning your sports fields to maximize performance and safety.

Surface Pro League Elite

A patented soil conditioner manufactured with smaller, more consistent particles that flow easily into aerification holes. Pro League's smaller, uniform particle size is tested and approved by Major League groundskeepers. Used as a topdressing, Pro League saves games and turf by preventing slick and muddy conditions that destroy turf and make fields unsafe and unplayable. It provides superior drainage and absorption, and delivers the color, safety, and performance of a Major League infield. 40/pallet.

LTPL 50LB \$ 14.25 40+ \$ 13.54 120+ \$ 13.11

50LB \$ 17.00 40+ \$ 16.15 120+ \$ 15.64

Profile Field & Fairway

Green-colored, medium-sized particle helps turf in native soils survive under intense traffic. When you incorporate it into the root zone, it adds porosity to prevent compaction in high-traffic areas. **Field & Fairway's** medium-sized particle holds moisture and nutrients, and provides a permanent balance of air and water space to increase drainage and prevent muddy conditions that destroy turf. 40/pallet.

LTFFG 50LB \$ 17.00 40+ \$ 16.15 120+ \$ 15.64

Surface Quick Dry

After a rain, **Surface Quick Dry** makes muddy, slippery conditions a thing of the past. Quick Dry will not cake, become slippery, or turn your field rock-hard, and it works over and over again. 40/pallet.

CHAPIN MIXES ON EXIT SPRAYER SYSTEM

2.2 GPM pump provides plenty of spray pressure. Mix valve has 8 dosage control settings, allowing you to set the mix ratio from 0 to 15 oz./gal. with most concentrates. System can be purged between different types of chemical use to prevent cross-contamination. Setting allows for water spray only.

HAND PRUNERS

FELCO #2 THE ORIGINAL

The original and still the best. Solid alloy metal handles with Swiss precision by-pass cut blade. Hardened nut and bolt, anvil blade with sap groove, adjustable blades, and built-in shock absorber. All parts are replaceable.

8392910001 **\$ 56.50**
 3+ **\$ 53.68**
 10+ **\$ 51.98**

FELCO #5 STEEL HANDLE

A lightweight, low-cost pruner with Felco quality and performance. Steel handles. 9" overall length.

8392910003 **\$ 34.75**
 3+ **\$ 33.01**

FELCO #6

Shorter, narrow, tapered blades allow for a powerful stroke and a very close cut. Smaller spread, ideal for smaller hands, ergonomic design. Blades easily replaced.

8392910004 **\$ 60.50**
 3+ **\$ 57.48**

FELCO #7 / #10 ROTATING HANDLES

Similar to the #6, but with rotating handles that move naturally to reduce hand fatigue.

RIGHT-HANDED MODEL #7:

8392910005 **\$ 83.50** 3+ **\$ 79.33**

LEFT-HANDED MODEL #10:

8392910008 **\$ 83.50** 3+ **\$ 79.33**

FELCO #8 / #9

Precision cut blade design, cushion stop, sap-groove, wire cutting notch, and fine blade adjustment. Angle of blade gives greater comfort and cutting power. 8-1/2" length.

RIGHT-HANDED MODEL #8:

8392910006 **\$ 62.00** 3+ **\$ 58.90**

LEFT-HANDED MODEL #9:

8392910007 **\$ 62.00** 3+ **\$ 58.90**

FELCO #13 TWO-HANDED

A one-handed pruner with extra long cutting blade handle allows the use of both hands when cutting very thick branches.

8392910017

PRUNING LADDERS

HASEGAWA ALUMINUM PRUNING LADDERS

The wide base, deep steps, telescopic back leg, as well as broad clawed feet and flat top make the Hasegawa Tripod Ladder incredibly safe and easy to use. Weight is directed downwards and outwards, pinning the ladder to the ground. The back leg adjusts quickly and easily up to 2' in 6" stops with a spring-loaded pin. Extending 6" and shortening 18" for use on slopes and uneven terrain. The ladder is available in two models: the original GSC model and the GSU model that includes a platform step. The GSU Platform model benefits from a deeper platform step, suitable for longer use, being the safest, most user-friendly ladder.

TREE WATERING BAGS

To irrigate trees from 4" up to 8" in caliper (trunk diameter), zip two 20-Gallon Tregator® bags together back-to-back around the tree trunk. This configuration allows each bag to expand more than it would as a single unit, thereby increasing the total capacity to approximately 50 Gallons.

20-GALLON OASIS WATERING BAG

Slow-release watering system that delivers a high volume of water directly to the root system of a newly planted tree with no run-off or evaporation. 2 bags may be zipped together for up to 8" diameter tree.

WAOT20 \$ 15.00 30+ \$ 13.80 90+ \$ 12.38

- 100% water absorption
- Reduces transplant stress
- Cuts watering frequency
- Reduces time spent at tree
- Available in two sizes: the 20-gallon standard and the 15-gallon Junior Pro.
- It takes approximately 5 to 9 hours for a 20-Gallon to completely empty.*

15-GALLON ARBOR SPRING WATERING BAG

The 15-Gallon variant delivers a high volume of water directly to the root system of a newly planted tree or shrub with no run-off or evaporation. It features a low-profile design that enables it to fit under plantings with branches beginning only 6" from the ground or higher. Plus, it's made of a durable brown PVC plastic that allows it to seamlessly blend with the surrounding landscape.

WAAS15 \$ 15.00 30+ \$ 13.80 90+ \$ 12.38

WATER TANKS

200 GALLON WATER TANK

This white plastic utility tank is used for transporting water and chemicals. This portable plastic tank was designed for a variety of applications and industries such as: pressure washing, auto detailing, lawn care, agriculture, and everyday liquid transportation. This utility tank offers convenient liquid transportation with tried and true durability.

ANIMAL CONTROL

TRIDENT DEER BARRIER SYSTEM

These barriers are made of semi-rounded strands, making them the lightweight option, easy to store, install and repair. Moreover, Trident Poly Deer Fences are reinforced at the bottom with tighter mesh pattern, meaning small critters are less likely to chew their way through. Our deer barrier heavy duty deluxe posts are made of galvanized steel and have a black vinyl coating, which blends in nicely with our barrier and provides maximum support for your deer barrier. The heavy duty deluxe posts utilize a ground sleeve to anchor to the ground and the post simply slides into the sleeve.

SMALL ENGINE SUPPLIES

REDMAX 2-CYCLE OIL

Specifically designed for high-RPM, high-performance, lean-burning, air-cooled 2-stroke engines, MaxLife engine oil contains special additives to reduce piston, ring groove, and crankcase deposits. It also reduces the fuel oxidation that causes varnish, gum and stale fuel. This oil has a very low ash content, which reduces engine deposits and exhaust port plugging. It also contains fuel stabilizers that double fuel life.

REDMAX BAR CHAIN OIL

RedMax bar and chain oils are specially formulated with dispersers and tackifiers to maximize lubricity and reduce heat buildup from chain friction. Specially formulated for high-RPM Pro Series chainsaws, they reduce the high-speed throw-off of oil and extend the bar and chain life

GAS CANS & VEHICLE SUPPLIES

NO SPILL GAS CAN

Most spills occur tipping a normal can to get the spout into the tank opening before the liquid comes out, or removing the spout from the target vessel before overflowing. The No-Spill spout is fully user controlled so you tip the can vertical, insert the spout into the vessel opening, then press the button to begin and control pouring. To stop pouring simply release the button. Practically eliminates spills and overflows. The only Spill-Proof spout with thumb button control that does not push down on your tank's filler neck to pour. More control, fewer tip-overs of your small equipment. The fastest pouring Spill-Proof nozzle available. At up to 3 gal/min, compare to other brands at 1.5 to 2.0 gal/min

No-Spill offers the highest quality gasoline can, the push button makes it easy to pour and not overflow with a nozzle that automatically stops the fuel flow when the target tank is full. The No-Spill nozzle flows up to twice as fast as other nozzles. Made in the USA

DEF FLUID

Blue Sky DEF is a urea-based solution composed of 32.5 percent high-purity urea and 67.5 percent deionized water. It is a clear, odorless liquid – almost like plain water – and very safe to handle. Blue Sky DEF is certified by the API for meeting the most stringent and rigorous standards, its purity is of the highest calibre. Blue Sky DEF is an inexpensive and efficient option for lowering NOx emissions, and is extremely easy to use.

APPENDIX 1

COOL SEASON TURF DISEASES

ANTHRACNOSE

Hosts: Creeping Bent, Bluegrass, Perennial Rye
 Diagnosis:
 Yellow to brown, irregular shaped patches of turf, leaf lesions yellow with black centers.
 Brown to black hairs may be observed on leaves or crown with 10X eyepiece
 Environment:
 Temperature > 78°F
 More than 10 hrs of leaf wetness per day for several days.
 Disease is particularly severe on turf exposed to soil compaction and excess thatch.
 Treatment: Daconil, Cleary's 3336, Banner Max, Rubigan, Bayleton.

BROWN PATCH

Hosts: All common species of turf grasses
 Diagnosis: Cool season turf grasses
 Circular patches of brown turf a few inches to several feet in diameter.
 Leaves at margins of the patch have gray irregular-shaped lesions with thin brown borders.
 Patches are surrounded by Smokey-colored ring of mycelium
 On close cut turf.
 Environment:
 Night temperature > 60°F
 More than 10 hrs of leaf wetness for day for several days.
 Disease is severe at low mowing heights.
 Disease is severe on poorly drained soils.
 Treatment: Daconil, Rubigan, Chipco 26019, Mancozeb, Eagle, Cleary's 3336, Banner Max, Spotrete, Bayleton.

DOLLAR SPOT

Hosts: All common species of turf grasses
 Diagnosis:
 Straw-colored patches of turf 1" – 3" in diameter.
 White mycelium may be associated with patches when Turf is wet.
 Straw-colored lesions extend across leaf-blades.
 Environment:
 Night temperature > 50°F and day temperatures < 90°F
 More than 10 hrs of leaf wetness for several days.
 Disease is severe on turf subjected to drought stress.
 Treatment: Daconil, Rubigan, Chipco 26019, Mancozeb, Eagle, Cleary's 3336, Banner Max, Spotrete, Bayleton.

GRAY LEAF SPOT

Hosts: Rye grasses and fescues may exhibit severe symptoms under prolonged warm, wet conditions.
 Diagnosis:
 Round or oval gray spots on leaves.
 Spots surrounded by yellow border.
 Leaves may be blighted gray, usually from tip downward.
 Environment:
 Night temperature > 70°F
 More than 10 hrs of leaf wetness per day for several days.
 Disease is severe in shaded areas or during periods of extended overcast weather.
 Treatment: Cleary's 3336.

PINK/GRAY SNOW MOLD

Hosts: All common species of turf grasses. Perennial rye in particular.
 Diagnosis:
 Gray: Circular straw-colored patches of turf usually less than 10" in diameter.
 Orange, brown to black sclerotia form on leaves.
 Pink: Salmon-colored red-brown patches 1" – 8" or more in diameter.
 Environment:
 Snow-cover. Gray is severe when snow-cover exceeds 90 days; Pink 60 days and snow covers unfrozen ground.
 Treatment: Rubigan, Chipco 26019, Mancozeb, 3336, Banner Max, Spotrete, PCNB.

'HELMINTHOSPORIUM' LEAF SPOT

Hosts: Bluegrass, fescue, perennial rye grass.
 Diagnosis:
 Round to oval chocolate-brown spots on leaves.
 Spots may have tan centers.
 Environment:
 Temperature > 77°F – 90°F
 Disease severity increases with temperature.
 More than 10 hrs of leaf wetness for several days.
 Treatment: Daconil, Chipco 26019, Mancozeb.

NECROTIC RING SPOT

Hosts: Bluegrass and fine-leaf fescue
 Diagnosis:
 Light-green to yellow patches of turf 3" – 15" in diameter turning brown to yellow.
 Roots and rhizomes are brown to black.
 Environment:
 Initiated at temperature < 80°F in moist soil.
 Severity increases with drought & high temperatures (> 80°F).
 Disease is severe on compacted soil.
 Treatment: Rubigan, Chipco 26019, Eagle, 3336, Banner Max.

PYTHIUM BLIGHT

Hosts: All turf grasses, particularly perennial rye grass.
 Diagnosis:
 Greasy brown patches of turf 1" or less in diameter, increasing to several inches and turning straw-colored.
 Gray-white, cottony mycelium in early morning.
 Environment:
 Night temperature > 65°F
 More than 10 hours of leaf wetness for several days.
 Poor drainage.
 Treatment: Alette, Subdue, Subdue Maxx.

RED THREAD

Hosts: Bluegrass, particularly fine-leaf fescue & perennial rye grass.
 Diagnosis:
 Red-brown patches of turf 1" – 4" or more in diameter.
 Pink-red mycelium grow from the tips of leaf blades
 Environment:
 Cool temperatures of 40°F – 70°F.
 Disease severity increases with temperature.
 More than 10 hours of leaf wetness for several days.
 Treatment: Daconil, Rubigan, Chipco 26019, Mancozeb, Eagle, 3336, Banner Max, Bayleton.

RUST

Hosts: All common species of turf grasses.
 Diagnosis:
 Red-brown powdery masses of spores on leaf blades.
 Environment:
 Temperature of 68°F – 86°F
 Disease is severe on turf under drought stress, low-mowing, shaded or poor air circulation.
 Treatment: Daconil, Rubigan, Mancozeb, Eagle, Banner Max, Bayleton.

SUMMER PATCH

Hosts: Bluegrass and fine-leaf fescue
 Diagnosis:
 Circular patches of wilted to straw-colored turf, usually less than 10" in diameter.
 Leaves turn yellow or brown starting at tips.
 Roots are light to dark brown.
 Environment:
 Daytime temperatures > 85°F.
 High soil moisture. Poor drainage. Low mowing height.
 Treatment: Rubigan, Eagle, 3336, Banner Max, Bayleton.

**Cultural practices may alleviate symptoms;
 SEE PAGE 19 for Fungicides.**

"There are no grass problems, only people problems" – George Toma, Super Bowl Groundskeeper

FYI: Not all fertilizer is created equal. The SGN on the bag is the Size Guide Number. Normally, the more particles, the better the results. Smaller particles more uniformly cover the area. So the smaller the SGN number, the smaller the particle.

PARTICLES PER SQUARE INCH MATRIX

SGN=> lbs/Acre	SGN 100	SGN 125	SGN 150	SGN 215	SGN 240
150	11.5	5.9	3.4	1.2	0.8
175	13.4	6.9	4.0	1.4	1.0
200	15.4	7.9	4.5	1.5	1.1
225	17.3	8.8	5.1	1.7	1.2
250	19.2	9.8	5.7	1.9	1.4
300	23.0	11.8	6.8	2.3	1.7

APPENDIX 2

FERTILIZING PROGRAM

Fertilizer regulation: First application March 1, last November 30

At clean-up, treat curb lines and sidewalk areas with *Barricade* spray.

MARCH 15	—	APRIL 30
APRIL 15	—	MAY 15

STEP 1: Crabgrass Prevention

All dates are approximate. Read the label for instructions.

BARRICADE with or without FERTILIZER:

March 15 – April 30

OR

DIMENSION with or without FERTILIZER:

April 15 - May 15 first application

For split application of Dimension crabgrass control, re-apply 6-9 weeks after initial application.

MAY 15	—	JUNE 15
-----------	---	------------

STEP 2: Weed Control

FERTILIZER

plus CONFRONT for commercial accounts

plus Lockup with or without fertilizer for residential accounts

Treat any crabgrass breakthrough areas with Q4, DRIVE or ACCLAIM spray- do not seed for 4 weeks.

JUNE 15	—	JULY 31
------------	---	------------

STEP 3: Insect Control

BIFENTHRIN with or without FERTILIZER: Surface Insects

MERIT with or without FERTILIZER: Sub Surface (by July 7)

ALLECTUS with or without FERTILIZER: (by July 7) Surface & Sub Surface

IMIIDA-LAMBADA with FERTILIZER: (by July 7) Surface & Sub Surface

ACELEPRYN with or without FERTILIZER: Sub Surface

AUGUST 15	—	OCTOBER 15
--------------	---	---------------

STEP 4: Fall Feeding*

August 15 – October 15

*If seeding: LEVITT'S 18-22-10 with Iron, a controlled release fertilizer with high levels of Phosphorous for seed establishment. 50lbs covers 12,500 square feet.

*Not seeding: LEVITT'S 25-0-10 controlled release fertilizer for long-term greening. 50lbs covers 12,500 square feet.

OCTOBER 1	—	NOVEMBER 30
--------------	---	----------------

STEP 5: Winterizer

October 1 – November 30

LEVITT'S 25-0-10 20%SCU 20%Nutralene, 20%Bio solids™

A slow-release fertilizer for quick green-up and extended feed. 50lbs covers 12,500 square feet.

OR

FERTILIZER with CONFRONT or LOCKUP:

KILL WINTER ANNUALS!

Feed the turf now and prevent weeds next spring, especially dandelions. Read label for coverage.
