These functional and stylish rear window louvers for the Mustang, Challenger, Charger and new 2010 Camaro bring back those performance days of the 60s and 70s.

Manufactured in both ABS and Aluminum Astra/Hammond louvers are available for many of those popular coupes and fastback cars of the past. Even today the early Camaros and Mustangs remain a popular application as car enthusiasts restore their dream vehicles.

These rear window louvers will provide protection from the sun and will keep you cooler on those hot summer days, plus privacy without compromising visibility.

The ABS louver is available in a UV-resistant textured black or a smooth finish (select models only) that can be painted. Ready-to-install, "no drill" stainless mounting plates allow for a flush-fit, while allowing for the louver to be easily removed to clean the glass when needed.

Our applications go back to the mid-1960s for the Camaro and Mustang, for the most in-depth vehicle listing in the aftermarket industry.
