Deepankar Vaidya, PE, joined RAM Group in June 2007 and is a Project Manager. He is involved in all activities related to the cost-effective management of sites contaminated with solvents, pesticides, and petroleum hydrocarbons. These include development of work plans for data collection, field implementation of work plans, compilation and evaluation of data, development of conceptual site models, performance of risk assessment, remediation of sites and regulatory interactions. His field experience includes management of subcontractors, installation of soil borings, groundwater monitoring wells, soil vapor sampling, ambient air sampling and development of reports including data analysis.

He is involved in several environmental compliance activities. These include auditing, air permitting, compilation of annual air emission inventory, Permit by Rule (PBR), Tier II reporting, and EPCRA TRI reporting using TRI-MEweb, SPCC, storm water reporting, waste-water reporting, pollution prevention plan (P2P), and waste management plans. He also has experience with air dispersion modeling using Screen3 and AERMOD.

He is involved in client and regulatory negotiation, interaction with stakeholders, technical proposals, and budgeting.

Deepankar Vaidya is registered as a Professional Engineer (P.E.) in state of Texas, Alabama, and Missouri; and is also a registered Corrective Action Project Manager for TCEQ's Leaking Petroleum Storage Tanks program. He is an active member of Texas Association of Environmental Professionals.
