

Run Water Order

By Order of the Mayor, a Run Water Order is in effect beginning today and running until April 20, 2021.

The water meters have been read for the last time this year. When you leave water running you will not be charged more than the monthly base rate of \$36.75 for sewer and water until the meters are read again next spring. You will be charged a service fee if you let your water meter freeze. Please leave a small, pencil sized, stream of water running to ensure your water does not freeze. This can be accomplished in several ways:

1. Set the water refill mechanism in your toilet to run continually.
2. Leave a bathroom cold water faucet running.
3. Connect a hose to an outside faucet and put the other end of the hose in a sewer clean out or next to a bush or tree.

If you have questions as how best to prevent your water pipes from freezing, contact one of our local plumbers.

Thanks in advance for your cooperation!

REMOVAL OF THIS NOTICE ONLY AFFECTS THOSE WHO WERE UNABLE TO READ IT
